Certificate of Analysis

Product Name: Surebounty Women's Probiotics 120B

Lot Number: 2510-130 **Serving Size:** 1 Capsule

Active Ingredients	Specification	Result
Total Probiotic Count	120 Billion CFU/capsule	140 Billion CFU/capsule

Analysis Requested	Result	Passed	Failed
Total Aerobic Plate	<500CFU/g	Yes	
Coliform	<20 CFU/g	Yes	
Enterobacteriaceae	<20CFU/g	Yes	
Yeast and Mold	<20 CFU/g	Yes	
Escherichia Coli	Negative/10g	Yes	
Salmonella	Negative/10g	Yes	
Staphylococcus Aureus	Negative/10g	Yes	

Heavy Metal	Result	Passed	Failed
Arsenic	0.196 ppm	Yes	
Cadmium	0.153 ppm	Yes	
Lead	0.044 ppm	Yes	
Mercury	<0.005 ppm	Yes

Tested by ISO Accredited Lab ETHOS ANALYTICS

The Gold Standard in Supplement Safety Verified by Ethos Analytics

We believe transparency is the foundation of trust. That's why every batch is independently tested to ensure it meets strict standards for purity, potency, and safety. Our Certificate of Analysis is developed in collaboration with Ethos Analytics to provide objective, science-based verification of product quality.

Why We Partner with Ethos Analytics

Ethos Analytics is an ISO 17025-accredited analytical laboratory specializing in food and dietary supplement testing. Known for precision and consistency, their validated methodologies provide the scientific foundation for our quality assurance program.

Through this partnership, every batch undergoes independent third-party testing to ensure unbiased, data-driven evaluation under strict quality standards.

Microbial Safety Testing

Each batch is tested for total aerobic plate count, coliforms, Enterobacteriaceae, yeast and mold, as well as key foodborne pathogens including E. coli, Salmonella, and Staphylococcus aureus. All results confirm compliance with strict microbial safety standards and controlled manufacturing conditions.

Heavy Metals Screening

Using advanced analytical techniques such as ICP-MS, each batch is tested for trace heavy metals including lead, arsenic, cadmium, and mercury. All results consistently fall well below internationally recognized safety thresholds, including USP <232> and California Proposition 65 limits.

Potency & Identity Verification

Advanced analytical methods confirm that active ingredients match the label declaration in both identity and potency, ensuring label accuracy and product consistency.

This partnership provides data-backed confidence in our quality claims. When you see the Ethos Analytics validation on the Certificate of Analysis, you can be assured that every Surebounty supplement meets rigorous standards for purity, potency, and safety.
